LANCE Sponsorship File

About us

As LANCE, the robotics team of Getronagan High School, we are a community of passionate students united by the goal of becoming a generation that not only consumes technology but also produces it. Founded in 2014, our team has participated in many different types of robotics competitions since then and achieved various successes.

With our team growing every year, we gain experience by participating in competitions in different categories, primarily the FRC (First Robotics Competition), and aim to achieve even greater successes in line with our goals.

Our mission

We are a team that aims to inspire young people. To this end, we strive to both develop our team and make a difference through our achievements. At the same time, we work to create a future filled with qualified individuals by enabling our female students to pursue studies in science, technology, engineering, arts, and mathematics (STEAM) fields.

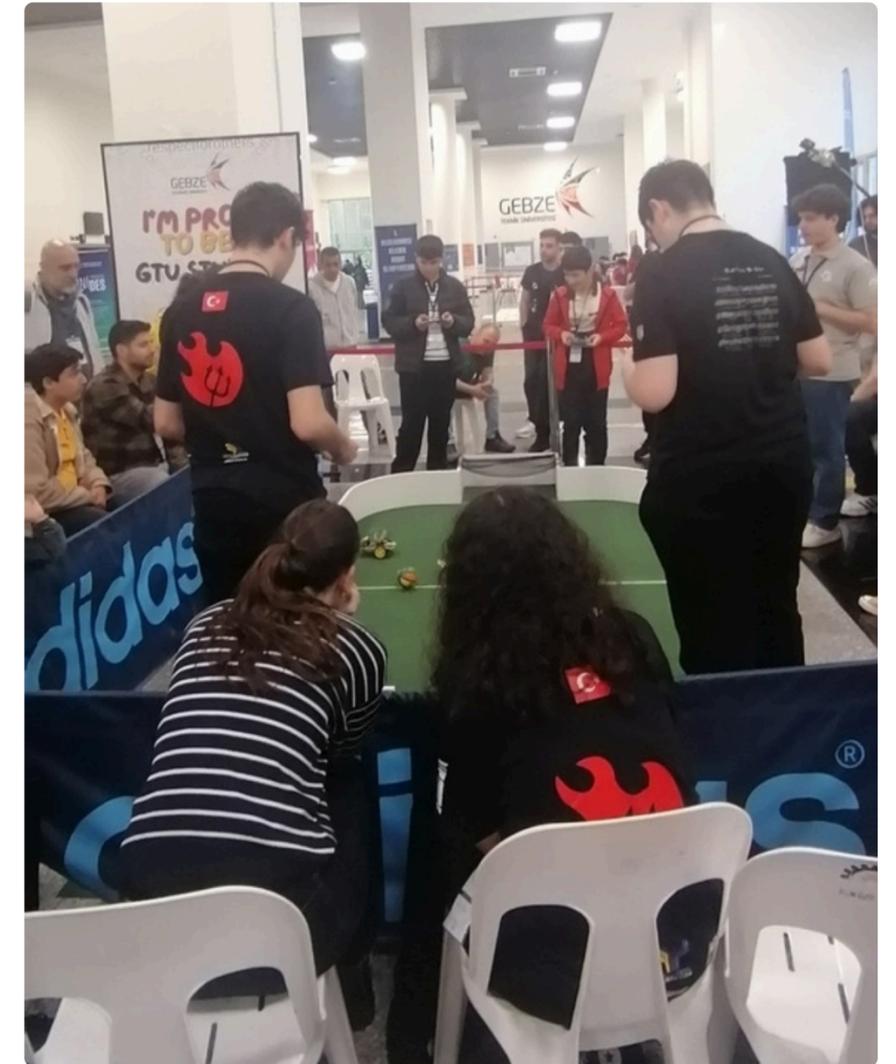

Events we attended

Umraniye FRC Off-Season

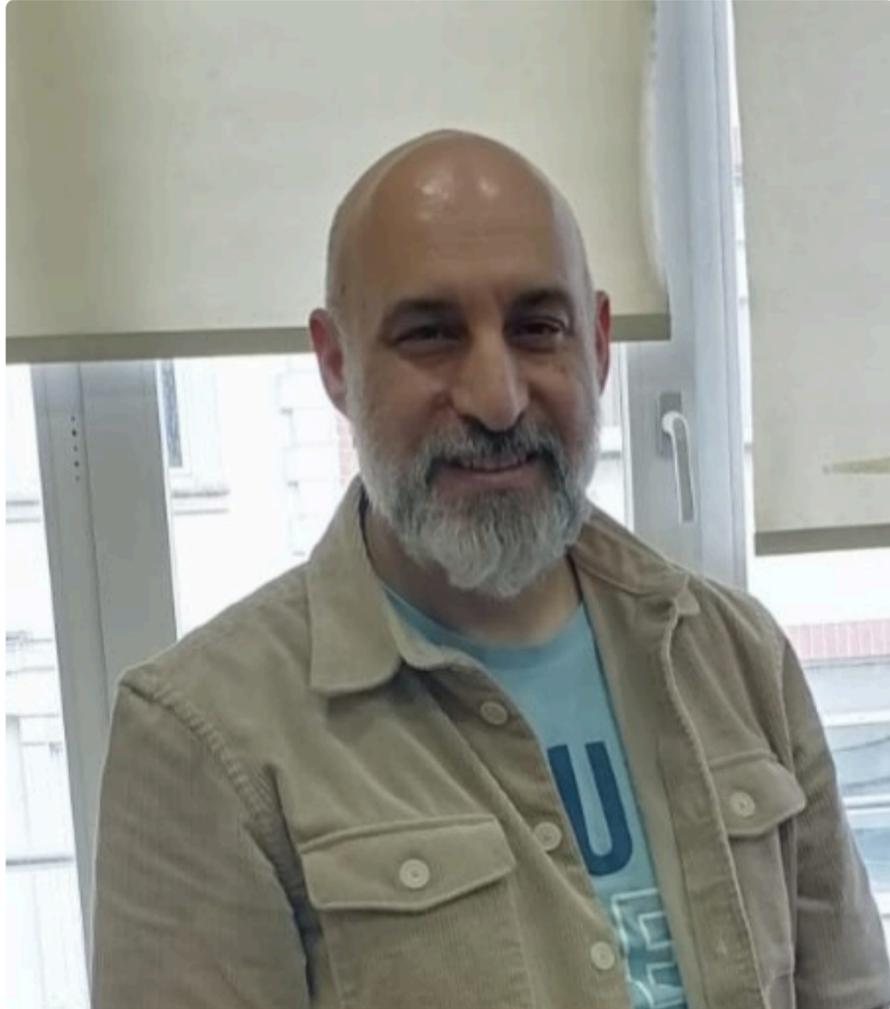

FRC 2025

Gebze Technical University
Kelebekro Robotics Olympics

Our Mentors

Alen Tascioglu

**Diran Robin
Alatciyan**

Masis Oznigolyan

Why should you support us?

We at Lance are proud to be the first minority school team to participate in **FRC Turkey**. This year, in our second season, we have both increased our team membership and achieved greater success in each competition.

This progress, achieved in a short time, is a testament to our determination, team spirit, and passion for science. However, to reach our goals and represent our country better, we need your support.

The contributions of our sponsors not only give us the opportunity to improve our robot but also enable us to inspire more students in **STEM** fields.

With your support, we can build a stronger team, create innovative projects, and take our achievements to the next level.

Together, we can nurture the engineers, scientists, and leaders of the future.

Would you like to be a part of this journey and support us?

Would you like to join us?
